

ISO/TS 16949:2002 AWARENESS

Key focus

1. Provide an introduction to Quality Management System and Improvement as it applies to the automotive industry.
2. Targeted towards the specific requirements in the automotive industry.
3. Especially with AFTA implementation, automotive industries have to gear themselves to be more productive and this is more the reason an automotive industry should embrace this standard.

Who will benefit

This course is intended for company personnel who are considering the development and implementation of a Quality Management System that meets ISO/TS 16949:2002 to achieve third party certification.

Methodology

This course has a balance of lectures and workshops to assist attendees to interpret the Standard in practical situations together with question and answer sessions during which specific points of concern may be raised. This training can be conducted in-house.
